# MYSTERY SURROUNDS

(Continued from First Page.)

(Continued from First Page.)

In his room and reads them constantly. But two people outside of the family are allowed within the cell. McCue's paster and his leading attorney.

Of his dead wife the accused man speaks occasionally, and always tenderly. He dreamed of her Saturday night, he says. This murdered woman's photograph is in the alleged murderer's cell along with those of their children.

Late this afternoon a small party arrived at the jail and passed quickly in. There were three women, all relatives of the accussed, and four children, some small, some large. Popular interest disregarded the elder members of the group, but hovered around the others. They were the McCue children, mysteriously recovered by mysterious means. Three of them were brought here at noon to-day from West Virginia. Until they walked into the cell, McCue did not know that they had been discovered.

been discovered.

He wept bitterly, and what passed between them no man outside knows or would attempt to know. The party stayed one hour and left.

#### The Defense.

The Defense.

Unsatisfactory as this glimpse of McCue on the eve of his trial, it is infinitely more than can be said with any degree of positiveness about the plea that he will present to the accusing court to-morrow. His life behind the cell wall must be gathered bit by bit from a half dozen sourcessome questlonable; these confectures of a hundred men are all that will throw light upon the line of defense. The attorneys on both sides are utterly uncommunicable.

torneys on both sides are utterly uncommunicable.
Captain Micajah Woods, of the prosecution, said to-day that the Commonwealth was ready to proceed, and expected to go into the case to-morrow, but the gentlemen of the defense said nothing. Sphinx-like taclurrily prevails at every nind. Despite this difficulty at gaining even an inkling of what the defense will put forward, it is generally regarded as probable that the defendant will, as a general plea, answer "not guilty" to the charge, trusting in the one case to the failure of the Commonwealth to hold up its end and in the other to the later special plea of temporary insanity. clai plea of temporary insanity. In other words, the defense, it is con-

clal plen of temporary insanity.

In other words, the defense, it is confectured, will proceed, taking mivaninge of every slip of the Commonwealth. If the evidence proves weak, and, since it must be practically entirely circumstantial, it will have to be very strong to convict, the matter will be at an end: if, on the contrary, the prosecution presents a strong and convincing array of evidence, the defense will then fall back upon the plea or temporary insanity. The blanket plea "not guilty," covering a possible later and special plea of the character indicated, would thus offer a double chance of escape. The first would carry no admission of guilt; the latter would be a fairly promising loop-hole for a desperate man. Els life in jall offers no evidence that might support a claim of aberration. His previous testimony in this case would be a point against him here. There are other things that would stand in the way and block the easy accomplishment of such a task as that of proving temporary, total, or any other kind of insanity of J. Samuel McCue.

The Woman in the Case.

#### The Woman in the Case.

A consideration of the list of witness of practically no assistance toward d

court to be of this sort is another matter. Every street corner sees some man or stroup of men expressing for the hundredth time his opinion of the affair in general, and of this feature of it in particular, and like as not names are not called, but the great eye of the law, which takes no notice of rumors except as possible clues to hidden facts, seems to have been unable as yet to ferret out anything.

Detectives have been at work upon the matter constantly, shrewd and quick moving men, but if they know anything they have not let it out. Silence is their part and silence elsewhere recognized as the summit of wisdom is taken by many mean in this instance the lack of to mean in this instance the lack of ability to speak for reasons more potential than that of mere caution. In other words, while signs may prove deceptive, the Commonwealth seems to have accomplished very little in this direction.

As far as the other witnesses are concerned particular interest attaches to the probable testimony of the McCue chil-

MRS. ANNA B. FRYE.

#### WHAT OVERWORK REALLY MEANS.

What a long story is condensed in that one word, which Mrs. Frye uses in her letter—as if "overwork" were a matter of course.

How many persons ever stop to realize that "overwork" simply means that their vitality has not been sufficient for the duties of the day—the work has probably been no more than a normally healthy person could do with ease.

Instead of calling it "over-work" it would be truer to speak of it as—"Under-vitality."

Remember, your strength is not in your muscles-Remember, your strength is not in your muscles—the muscles simply work when the nerve force tells them to. Even your brain does not work by itself—the substance in your brain cells depends on getting energy with which to do its work; and this energy is nerve force—the same great power of-life that actuates every function of the body.

Every form of weakness, or sickness, or disease, results from a lack of the strong nerve force which should keep the organs working properly.

When one speaks of "a good constitution," one simply means a sound, strong nerve system.

When the nerve system is not strong and well-nourished, it follows inevitably that one is easily "over-worked"—easily run down—just as Mrs. Frye

"As a tonic and invigorator I am sure nothing equals Paine's Cerely Compound. I have it always on hand.

"When weak and nervous, or restless from overwork, a dose of it soothes and strengthens me so that I wake up bright and refreshed, and fully capable of going through a strenuous day's work."—Mrs. Anna B. Frye, 122 DeKalb Ave., Brooklyn, N. Y., August 5, 1904.

The nerves need food to keep up their strength. Their food is not the same food that we usually

Prof. Phelps, of Dartmouth University, was the first physician to enunciate the principle which to-day is recognized as one of the foundations of the science of medicine,—the great enlightening truth, that the nerve system rules all the body's health.

He sought and found the food that builds up and restores the nerves—his celery formula, which has become famous as Paine's Celery Compound—the celebrated nerve vitalizer and tonic.

Doctors know and value this prescription and make constant use of it in their practice.

was, besides the man and wife, the sole person in the house on the night of the murder. The testimony of the bey is awaited with the very livelest interest. At the inquest he said he had heard Mrs. McCue crying and caught the words, "Sam, he is killing me." It is commonly reported that since making this statement, the negro has amended it in a very material manner. A good deal may

### TREATMENT OF PILES.

cure of piles, comes to the conclusion that there is no cure except by an operation, and rather than undergo this "last resort," he suffers on, resigned to the situation, so far as may be. The attention of those interested is invited to the following experience:

"After ten years of suffering from blind, bleeding and protruding piles, and after using every remedy I could hear of without any benefit. I finally bought a fiftycent box of Pyramid Pile Cure, and used it with such good results I bought next a dollar box, which finished up the job. That was nearly six years ago, and as far as piles is concerned I am cured, and have never felt a symptom of them since. "Many others have used this remedy by my advice, with the same results, and I always recommend it to sufferers with piles." C. H. Potts, Burlington, Kan.

Testimony like this should convince the most skeptical the Pyramid Pile Cure not only cures, but cures to stay cured. It is in the form of a suppository, can be applied in the privacy of the home, directly to the parts afflicted, and does its work quickly and painlessiy.

Druggists generally sell this famous remedy for lifty cents a package, and sufferers are urged to buy a package now and give it a trial to-night, Accept no substitutes.

A little book describing the causes and cure of piles is published by the Pyramid Drug Co., Marshall, Mich., and same will be sent free to any address for the asking.
